Simple Identification for a Stroke

Sometimes symptoms of a stroke are difficult to identify. Unfortunately, the lack of awareness spells disaster. The stroke victim may suffer brain damage when people nearby fail to recognize the symptoms of a stroke. Now doctors say a bystander can recognize a stroke by asking three simple questions:

1. Ask the individual to SMILE.
2. Ask him or her to RAISE BOTH ARMS.
3. Ask the person to SPEAK A SIMPLE SENTENCE.

If he or she has trouble with any of these tasks, call 9-1-1 immediately and describe the symptoms to the dispatcher. After discovering that a group of nonmedical volunteers could identify facial weakness, arm weakness and speech problems, researchers urged the general public to learn the three questions. They presented their conclusions at the American Stroke Association's annual meeting last February.

Widespread use of this test could result in prompt diagnosis and treatment of the stroke and prevent brain damage. A cardiologist says if everyone who gets this e-mail sends it to 10 people, you can bet that at least one life will be saved. BE A FRIEND AND SHARE THIS ARTICLE WITH AS MANY FRIENDS AS POSSIBLE. It could save a life!!

Additional Information: Stroke is a medical emergency. Know these warning signs of stroke and teach them to others. Every second counts:

1. Sudden numbness or weakness of the face, arm or leg, especially on one side of the body
2. Sudden confusion, trouble speaking or understanding
3. Sudden trouble seeing in one or both eyes
4. Sudden trouble walking, dizziness, loss of balance or coordination
5. Sudden, severe headache with no known cause

Call 9-1-1 immediately if you experience symptoms!
Time lost is brain lost!
Make sure the people you care about learn to recognize a stroke and act quickly.
